

Our new
CLOUD TELEPHONE
 system ideal for
TRADE
 businesses always on the go

JT's Cloud PBX is a cloud-based, flexible and powerful business telephony solution, providing customers with a future-proof alternative to traditional, on-premise phone systems. JT's Cloud PBX sits at the heart of our core network, installation is hassle free and the benefits to your business continue...

FUTURE-PROOF

Moving to the Cloud.

Driven by new, flexible ways of working, PBX technology has moved from on-premise equipment to 100% cloud-based.

JT Cloud PBX will optimise your operations productivity and help you save money.

JT Cloud PBX capabilities:

- Supports multiple office locations and mobile users
- Fully scalable from 2 – 1000 extensions
- Compatible with MS Outlook
- Request users to be added and removed
- Hosted in JT's own world-class Data Centres
- IVR (Interactive Voice Response) offers interactive selection
- Auto Attendant – automatically transfer callers

EFFICIENT

Modern communication system.

A fixed or mobile network agnostic, BYOD-ready solution, JT Cloud PBX provides cost savings, security and flexibility whilst managing your business communications.

A seamless system deployed via dedicated portals, JT Cloud PBX lets users optimise business communications, maximise productivity, and work more efficiently.

JT Cloud PBX users can:

- Schedule conference calls
- Control number presentation, switching easily between business and personal numbers
- Answer calls across mobile and desk phone
- Access usage and performance analytics

FLEXIBLE

Compatible across fixed and mobile.

We understand the communication needs of non-office based businesses and JT Cloud PBX is perfect for those always on the go. It's easy to set up, easy to use and works in conjunction with a powerful and user-friendly app built for both iOS and Android devices so your users can communicate through hardware they are comfortable with.

JT Cloud PBX allows users to:

- Set their status
- Adjust call forwarding
- Specify whitelist numbers to override absence status
- Separate private and business calls
- Record their own IVR messages and hold music
- Record calls with storage and playback

Did you know...

Cloud PBX is set to be a \$12 billion market by 2018.
