

# Media Release

24 February 2016

## **JT's experts lead global tech webinars**

JT's expertise and knowledge has been the foundation of two recent webinars hosted by Engerati, a provider of an online community of networking, collaboration, knowledge sharing and engagement for global energy professionals.

Paul Bullock, JT's Head of M2M, delivered the first online presentation on the topic 'M2M and the Internet of Things (IoT); Operator Power, Integrator Flexibility' on Monday 22 February 2016. The webinar provided the global Engerati membership, which includes senior smart energy professionals, with insight into the key issues faced when navigating the latest machine, or device, communication technologies.

JT has proven expertise in the M2M arena specialising in user based insurance, fleet management and smart metering. Its Wholesale division developed a unique Managed M2M platform to deliver resilient connectivity, Connectivity Management, Testing and Quality Assurance. JT's team are experienced in delivering its global customer base a range of M2M solutions and products from wholesale connectivity to direct enterprise offerings.

Paul Bullock explained: "The M2M and IoT space is moving very quickly and because we are at the forefront of delivering these services to a global customer base, Engerati has provided us with a platform to deliver a webinar on this topic for their 26,000 strong membership. I'm proud to present JTM2M to this audience and explain how we provide global, multi-network M2M solutions to enable our customers to benefit from the very latest device technology.

"We are delighted to be able to draw on our experience in this field to offer guidance and insight to executives to help them embrace new technologies that could really enhance their business. This is a new partnership which gives our team access to global energy professionals

## **Notes to Editor**

**Engerati** is a central destination for delegates from leading global energy events to network, collaborate, share and engage. We provide our members with completely free access to our ever-growing archive of industry news, white papers, case studies, webinars, video presentations, interviews and blogs. Engerati is an invaluable resource to all energy professionals – nowhere else can you get such in-depth information on the global energy industry for free.

**JT** is a full-service Tier-1 global consumer and business enterprise provider with a 120-year heritage based in the Channel Islands. JT offers a domestic and global customer base a range of world-class services including; voice and data; consultancy; co-location; leading-edge data hosting; internet; security; cloud back-up; fixed and mobile technologies; e-Gaming; M2M; Cloud Services (IaaS); fully managed IT services; and wholesale solutions. Across 11 global locations, JT employs over 600 staff providing products and services to over 1 million global consumer subscribers and 2,177 active business customers. JT has an international presence across Europe, Asia and the United States that has aided its evolution in becoming a leading supplier in roamed services.

JT's award winning Gigabit Isles point-to-point fibre optic network programme, which is reaching conclusion in Jersey and progressing in Guernsey, has seen Jersey rank 4th globally for fibre connectivity and will provide fibre connections to every premise in Jersey. In 2015 JT also completed deployment of a state of the art 4G mobile network helping ensure the Channel Islands are one of the most seamlessly connected
