

# JT Cyber Compliance

Powered by centraleyes

## Product Description

For any company looking to maintain compliance to security standards, whether to certify or not, it can be an arduous task. With spreadsheet upon spreadsheet, documents scattered around and time and labour-intensive workshops and exercises, the effort adds up, and so does the cost. With JT Cyber Compliance, in Partnership with Centraleyes, manual processing can be a thing of the past.

## Why Centraleyes?

Split into three easy to use modules, the Centraleyes platform can track compliance for your business and your third parties and produce an interactive board report which is guaranteed to wow your stakeholders.

Buy all three modules or mix and match to suit your business needs.

## Module 1 - 1st Party Risk

Select from a pool of pre-populated Cyber and Information Security frameworks, including NIST CSF, ISO27001, PCI DSS, GDPR and the CIS Controls Top 18 (formerly the SANS Top 20). Custom questionnaires and standards suited to your industry can be uploaded into the platform, so you can track your compliance against the frameworks most important to you.

### Features

- Smart questionnaires, assign individual questions or complete sections to the right people from the start, cutting down on time spent in meetings and chasing responses.

*Continued on next page...*

- Automated workflows and due-date reminders so that you don't have to do the chasing.
- Streamlined dashboard, see your overall score, compare the areas of your business that are most at risk and view your actual compliance against industry-based targets.

- Remediation planner that identifies gaps in your compliance and allows you to assign custom tasks to individuals.

## Module 2 – 3rd Party Risk

Vendors pose an immediate cyber security risk to your organisation. You trust them with your data but if their policies, procedures and practices are not as robust as yours you may find yourself at the center of a data breach, and you might not even know about it until it's too late. Using the 3rd Party Risk module in the Centraleyes platform can help you track your vendor risk and report on breaches in real time.

### Features

- Manage multiple vendors with varying risk levels within one central interface.
- Send out automated questionnaires and request evidence, such as Pen Test results, security certifications and policies.

- Public and dark web monitoring, alerting you about threats and breaches in your supply chain in real time.
- Track your vendor remediation plans directly through a single platform.

## Module 3 – Board View

Static reports are a thing of the past. With Centraleyes Board View, designed to be easily consumed by non-technical audiences, you can drill down into the detail of your risk, compliance and threat data to provide a meaningful view of your organisation's security posture. View changes over time, track security projects and budget and view your most risky assets all in one easy to use platform.

### Features

- Interactive dashboard, drills down into the detail directly within the platform.
- View your risk, compliance and threat level over time, allowing you to focus on the areas that need it most.
