

# JT Vendor Risk Management

Powered by  centraleyes

## Product Description

Vendors pose an immediate security risk to your organisation. You may trust them with your data but if their policies, procedures and practices are not as robust as yours you may find yourself at the centre of a data breach, and you might not even know about it until it's too late.

## Vendor Risk Management with Centraleyes 3rd Party Risk Module

JT Vendor Risk Management will provide you with a comprehensive look at how you manage, track and report on your vendors, giving you a complete understanding of your vendor risk profile.

A Vendor Risk Assessment will review your current vendor risk management program, including policy and onboarding, monitoring and management processes. The assessment is completed using JT's risk assessment framework, applying recommendations from industry standards such as ISO27001 and NIST SP800-53.

Add the 3rd Party Risk module of the JT Centraleyes Compliance Platform as part of the package and you can manage and view the security of your vendors and risk to your business in a single platform.

## Why JT?

### Expertise

Our Cybersecurity consultants have a wide range of knowledge in areas including governance, risk and compliance practices, and supporting technical expertise.

### Flexibility

The Assessment is completed with minimal intrusion into the operation of your business and can be facilitated both onsite and remotely.

### Tracking

If selected you will be provided 24x7x365 access to the fully comprehensive Centraleyes compliance platform, in partnership with Centraleyes. Perfect for your business to collect, analyse and report on ongoing compliance to the standards you choose.

For more information on what the JT Centraleyes Compliance Platform can do for your business please view the **JT Cyber Compliance product description**, or contact the **JT Cybersecurity and Risk Advisory Unit** for a free demo.
